## Medispa Paramedical Esthetic Courses

The Medispa Paramedical Esthetic Courses was developed to provide estheticians, cosmetologists, and health professionals with the knowledge and skill to perform advanced paramedical therapies. This training is the most comprehensive in the para-medical field. If your interest lies in starting your own business, our marketing director will speak with you about the necessary steps involved to do this.

The Medispa Paramedical Course content was developed by experienced lecturers and professionals in cosmetic medicine and paramedical therapies. During our 4 day workshop you will learn how to assist doctors during botox and restylane treatments. You will learn how to safely apply jesner, designer and glycolic acid peel to the skin. Medispa is a leader in Cold Laser and microdermabrasion technology at the workshop you will learn to how to operate three different microdermabrasion machines (diamond, crystal and ultrasonic). Discover the power of light with our Swiss manufactured Cold Laser for skin rejuvenation. We will show you how to remove broken capillaries and pustule acne within minutes with our high frequency electrolysis machine from Switzerland.

Let us take you to new heights in your career! Allow us to teach you about this amazing industry that just keeps growing. Earn more money with all of these skills and become well versed in the medical esthetics industry today.
